## SALT WATER TAFFY

SCIENTISTS agree that foods treated with ultra-violet rays are more healthful. The treatment of James' Salt Water Taffy increases and preserves its healthful qualities while the billions of air cells provide an exceptional field for the absorption of these rays.

The irradiating of Salt Water Taffy is original with James' Inc., and is the outstanding achievement in the manufacture of Salt Water Taffy, surpassing all past efforts to give the public a product that is wholesome and healthful.

We are Salt Water Taffy specialists and the use of ultra-violet rays is included in our:

- Original "Cut-To-Fit-The-Mouth" Salt Water Taffy
- Chocolate Sealed—our delicious taffy covered with fine rich chocolate—each piece foil wrapped
- "Cello-Sealed"—(Salt Water Taffy sealed in cellophane) in the new "Cut-To-Fit-The-Mouth" shape

Treating with the ultra-violet ray is just one of the many extra features that make James' Salt Water Taffy a favorite with those who want the best.
